Java Project
Student ID: 1305007,1305037,1305059

//Signing Up Rule

For signing up,user needs to give a valid 17 digit NID. The column "nidandname"
contains valid NIDs. If user's given NID
is valid and other conditions are correct, then user will be able to create an
account.

//NID

NID is not a random number. It contains several code like upazilla code, district
code,area code etc.

//File Location
User cannot send file larger than 25 MB. To store the file in server, a new folder
named "C:\Stored Data From Client"
needs to open in C drive.

//Pie chart
Pie chart is created based on votes given by users on a particular problem type. If
in a particular problem type
no one voted, then in pie chart this type will possess no area.

//".sql"
java_project.txt is .sql file
